

Blogs

A Blog website again a great website tool and can be used to great effect with all types of Community Groups or Companies. Blogs websites allow companies to keep their customers up-to-date with the latest news; they also involve their customers and visitors and allow them to feel part of the Website.

Blogs can be set up to allow visitors to add comments, but the choice is yours, you may decide to have a blog where visitor comments are not permitted. You choose what best suits your needs.

You may have a tag board that allows quick and short messages to be posted, these can be seen as a bit of fun.

Once again as with forums, these sites can take time to manage, this is where Web by Creation can assist you. We will design, create and monitor your blog – update and keep you informed of your visitors, posts and the statistics of your website blog. We set up your blog the way that fits the needs of your group or company.
